

## **Good-bye Purcellville, Hello Ashburn, VA!**

On July 14<sup>th</sup>, 2009, the Purcellville, VA office of Triad Engineering closed its doors for good as the staff made their way east to open Triad's newest office location in Ashburn, Virginia. The staff leaves behind a quaint, small-town neighborhood for the bustling Dulles Corridor, which has been named one of the fastest growing regions in the country. The new office consists of 10,166 square feet of office, lab and flex space.

According to Northern Virginia office Branch Manager Bob Holstead, "This is an aggressive relocation, but one we believe will best position Triad for the anticipated economic recovery and associated growth in the National Capital Region."

Joining the Ashburn team are Bill Mikalik, CPG and Brad Pearson, who are transferring from Triad's Winchester, VA Environmental Department. Bill will serve as the office's Environmental Department Manager, and will be tasked with growing the department by implementing new business development initiatives as we stretch and grow our business further into Northern Virginia, DC and Maryland.

The staff of Ashburn brings with them an optimistic outlook for reaching into new markets and expanding their client base! We invite you to stop by Beaumeade Circle for a visit to our new office space.

New address and contact information:
