

WORKING FOR TRIAD

Triad Engineering, Inc. is 100% employee-owned and operated. Our Employee Stock Ownership Plan serves as a company-funded retirement plan for employees by holding tax-free investments on their behalf. Our plan is overseen by appointed Trustees and Triad's Board of Directors and administrated by a company specializing in ESOP programs; however, being part of an ESOP is about more than just a retirement plan. As an employee owned firm, we care about each other, we care about our work, and we care about our clients. Our standards are high, but we are always on the lookout for the best new employees to help grow our family.
